How to play "Pokémon Babanuki Super high tension"

3 to 6 players (recommended: 5)

Super high tension = Hyper Mode

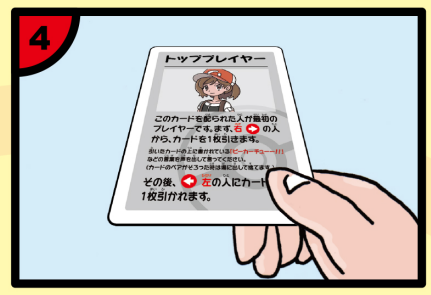

Remove the two spare cards that do not show a Pokémon. Shuffle the rest of the cards.

Deal out all the cards to the players. This will be your hand.

If a player has a matching pair in their hand, show the pair to everyone and then give each card to a different player. (If there are three or more players other than yourself, you may choose which two players to pass to.)

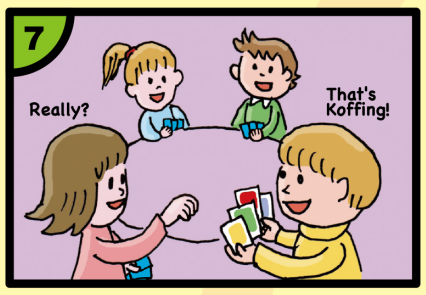

Whoever has the "Top Player" card places it in front of themselves.
The game starts with that person.

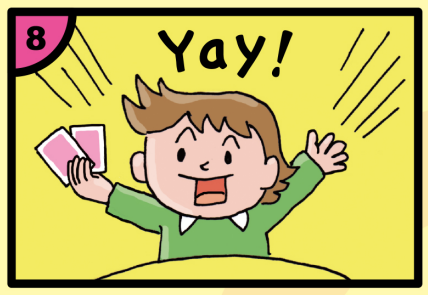

First, draw a card from the hand of the person to your right. This card will have a word written on it (e.g., "oos-so!"), so say the word out loud. This includes the Koffing card. If there is a special effect written on the card, follow the instructions.

If you get a pair of matching cards, discard them. (If there is a special effect on the drawn matching card, you must still follow the instructions before discarding it.)

The player to the left of the starting player will then draw a card from the hand of the person to their right. This is repeated in a circle.

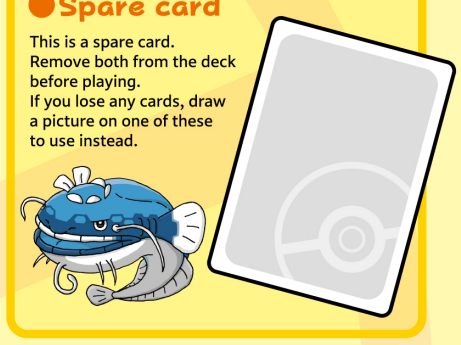

Whoever is left with no cards in their hand wins and leaves the game. (If the person to your right has already left the game, you should not draw a card, but let the next player after you draw one of your cards.)

The last person who holds the Koffing card loses the game.

Spare card

This is a spare card.
Remove both from the deck before playing.
If you lose any cards, draw a picture on one of these to use instead.

Sing Around Cards

If someone draws one of these cards and says the Pokémon cry, everyone holding the same Pokémon should also say it. Go in a circle and say them one after another!

Dondozo
If someone draws this card, you also say, **"hei-rash-sha!"**.

Inkay
If someone draws this card, you also say, **"mā-ee-ka"**.

Fuecoco
If someone draws this card, you also say, **"ho-gē!"**.

Sudowoodo
If someone draws this card, you also say, **"oos-so!"**.

Action Cards

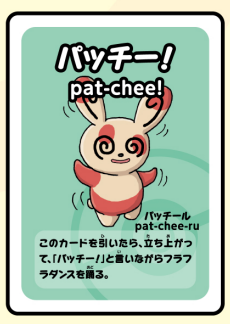

When you draw one of these cards, take the action written on the card right then and there. Don't be shy!

Dedenne
If you draw this card, say, **"de-dē-n!"**, while staring at the next player and holding your cards in the same way as Dedenne.

Ludicolo
If you draw this card, say, **"lu-n-pap lu-n-pap!"**, while waving your hands and dancing like Ludicolo.

Spinda
If you draw this card, say, **"pat-chee!"**, while standing up and dancing in a swaying manner.

Snorlax
If you draw this card, say, **"ka-bee!"**, while closing your eyes and pretending to be asleep.

Tatsugiri
If you draw this card, say, **"su-shi-su-shi"**, while pretending to make sushi.

Sing Around & Action Cards

If someone draws one of these cards, everyone holding the same Pokémon should also say the Pokémon cry and take the action written on the card. It's more fun when you both do it at the same time!

Pikachu
If someone draws this card, everyone who holds a Pikachu card says, **"pī-kā-chuuuu!!"**, while pointing at any other player in the same way as Pikachu.

Wobbuffet
If someone draws this card, everyone who holds a Wobbuffet card says, **"sō-na-n-su!"**, while making the same pose as Wobbuffet.

Togepi
If you draw this card, say, **"cho-gep-pree!"**, while swapping one card from your hand with any other player. Swap the cards face-down.
(Ignore the cry and effect on the card you pass on)

Comfey
If you draw this card, everyone says, **"kyu-wa-wā!"**, while simultaneously passing one card from their hand face-down to the person on their left all together.
(Ignore the cry and effect on the card you pass on)

Deoxys
Form Change: If you draw this card, you may swap your entire hand with someone else's hand.
(You may choose not to switch.)

Swirlix
If you draw this card, after saying, **"pe-lop-pa!"**, you may pass this card to another player.
(You may choose not to pass it.)

Dive Ball
If you draw this card, everyone who has a 💧-mark card puts up their hand. You may choose one player to give you one of their 💧-mark cards face-down.
(The player who gives the card may choose which one to give)

Koffing
This is the Koffing card. Whoever holds this card at the end of the game loses.

Top Player
The person who is dealt this card is the first player. To start, draw a card from the person to your **right**. When you draw a card, say the word written at the top of the card out loud, e.g. **"pī-kā-chuuuu!!"**. (If you draw a matching card and make a pair, discard both cards.) Next, let the person to your **left** draw one of your cards.

How to play "Pokémon Matching Game"

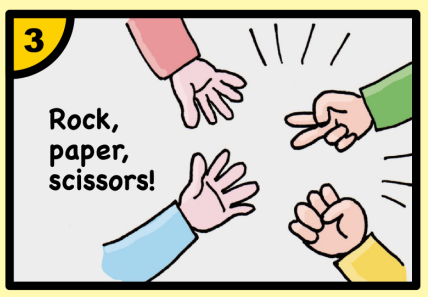

2 to 6 players

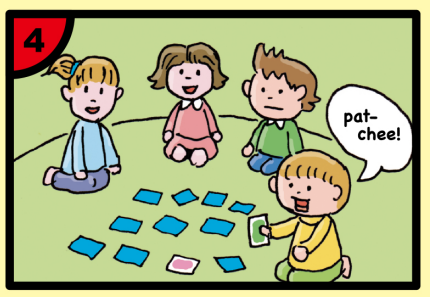

Remove the "Top Player" and the two spare cards (the ones without Pokémon).

Lay out the 33 cards, face down.

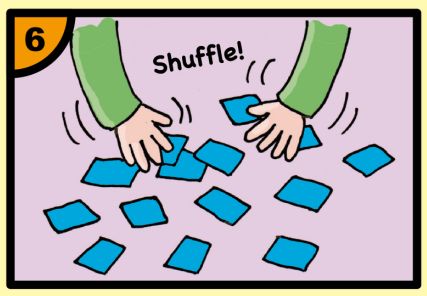

Decide the order with a game of rock-paper-scissors. Start with the person who wins, and move clockwise.

When it's your turn, flip over two cards. If they are both different Pokémon, show them to the other players, remember where they were, and flip both cards back face down. (It's fun to make the Pokémon's sound when you turn over the cards!)

If the two cards show the same Pokémon, you get to keep them both. (In Pokémon Matching Game, the cards' special effects are not used. Similarly, the Koffing card does not determine the loser at the end.)

If you flip over a card and get Koffing, place the Koffing card face down, and then mix up all the cards.

The game ends when there is only Koffing left. The person who holds the most cards wins.

Types of Cards

This is a regular card. When you draw the card, say the word written on top ("oos-so!" etc.). Ignore the special effects written on the bottom.

If you draw this card, return it face down, and then mix up all the cards. The game ends when there is only this card left.

For ages 4 & up
